# COMPANY OVERVIEW

Medical Properties Trust, Inc. is a self-advised real estate investment trust that provides capital to hospital operators located throughout the U.S. and other countries. We focus exclusively on hospitals, which is where the highest intensity of care is provided to patients. MPT is currently the second-largest non-governmental owner of hospital beds in the U.S. Our financing model allows owners of hospitals to unlock the value of their underlying real estate, primarily through sale leaseback transactions.

Notes:

(A) Certain line items above (such as real estate depreciation) include our share of such income/expense from unconsolidated joint ventures. These amounts are included with the activity of all of our equity interests in the "Earnings from equity interests" line on the consolidated statements of income.

(B) Investors and analysts following the real estate industry utilize funds from operations, or FFO, as a supplemental performance measure. FFO, reflecting the assumption that real estate asset values rise or fall with market conditions, principally adjusts for the effects of GAAP depreciation and amortization of real estate assets, which assumes that the value of real estate diminishes predictably over time. We compute FFO in accordance with the definition provided by the National Association of Real Estate Investment Trusts, or NAREIT, which represents net income (loss) (computed in accordance with GAAP), excluding gains (losses) on sales of real estate and impairment charges on real estate assets, plus real estate depreciation and amortization and after adjustments for unconsolidated partnerships and joint ventures.

In addition to presenting FFO in accordance with the NAREIT definition, we also disclose normalized FFO, which adjusts FFO for items that relate to unanticipated or non-core events or activities or accounting changes that, if not noted, would make comparison to prior period results and market expectations less meaningful to investors and analysts. We believe that the use of FFO, combined with the required GAAP presentations, improves the understanding of our operating results among investors and the use of normalized FFO makes comparisons of our operating results with prior periods and other companies more meaningful. While FFO and normalized FFO are relevant and widely used supplemental measures of operating and financial performance of REITs, they should not be viewed as a substitute measure of our operating performance since the measures do not reflect either depreciation and amortization costs or the level of capital expenditures and leasing costs necessary to maintain the operating performance of our properties, which can be significant economic costs that could materially impact our results of operations. FFO and normalized FFO should not be considered an alternative to net income (loss) (computed in accordance with GAAP) as indicators of our financial performance or to cash flow from operating activities (computed in accordance with GAAP) as an indicator of our liquidity.

We calculate adjusted funds from operations, or AFFO, by subtracting from or adding to normalized FFO (i) unbilled rent revenue, (ii) non-cash share-based compensation expense, and (iii) amortization of deferred financing costs. AFFO is an operating measurement that we use to analyze our results of operations based on the receipt, rather than the accrual, of our rental revenue and on certain other adjustments. We believe that this is an important measurement because our leases generally have significant contractual escalations of base rents and therefore result in recognition of rental income that is not collected until future periods, and costs that are deferred or are non-cash charges. Our calculation of AFFO may not be comparable to AFFO or similarly titled measures reported by other REITs. AFFO should not be considered as an alternative to net income (calculated pursuant to GAAP) as an indicator of our results of operations or to cash flow from operating activities (calculated pursuant to GAAP) as an indicator of our liquidity.

(A) Reflects our commitment to invest in 16 facilities in the United States (Prospect).

(B) Includes our share of interest, real estate depreciation and income tax expense from unconsolidated joint ventures.

Investors and analysts following the real estate industry utilize net debt (debt less cash) to EBITDA (net income before interest expense, income taxes, depreciation and amortization) as a measurement of leverage that shows how many years it would take for us to pay back our debt, assuming net debt and EBITDA are held constant. The table above considers the pro forma effects on net debt and EBITDA from investments and capital transactions that were either completed during the period or disclosed as firm commitments, assuming such transactions were consummated/fully funded as of the beginning of the period. In addition, we show EBITDA adjusted to exclude stock compensation expense, gains or losses on real estate and other dispositions, debt refinancing or similar charges, and impairment charges to derive Pro forma Annualized Adjusted EBITDA, which is a non-GAAP measure. We believe Pro forma Net Debt and Pro forma Annualized Adjusted EBITDA are useful to investors and analysts as they allow for a more current view of our credit quality and allow for the comparison of our credit strength between periods and to other real estate companies without the effect of items that by their nature are not comparable from period to period.
